**ITEM 2.02. RESULTS OF OPERATIONS AND FINANCIAL CONDITION.**

On July 31, 2009, White Mountains Insurance Group, Ltd. issued a press release announcing its results for the three and six months ended June 30, 2009. The press release furnished herewith is attached as Exhibit 99.1 to this Form 8-K. Certain information included in the press release constitutes non-GAAP financial measures (as defined in Regulation G of the Securities and Exchange Commission). Specifically, non-GAAP financial measures disclosed in the press release are adjusted comprehensive net income and adjusted book value per share. White Mountains believes these measures to be more relevant than comparable GAAP measures in evaluating White Mountains' financial performance.

Adjusted comprehensive net income is a non-GAAP financial measure that excludes the change in net unrealized gains and losses from Symetra's fixed maturity portfolio from comprehensive net income. In the calculation of comprehensive net income under GAAP, fixed maturity investments are marked-to-market while the liabilities to which those assets are matched are not. Symetra attempts to earn a "spread" between what it earns on its investments and what it pays out on its products. In order to try to fix this spread, Symetra invests in a manner that tries to match the duration and cash flows of its investments with the required cash outflows associated with its life insurance and structured settlements products. As a result, Symetra typically earns the same spread on in-force business whether interest rates fall or rise. Further, at any given time, some of Symetra's structured settlement obligations may extend 40 or 50 years into the future, which is further out than the longest maturing fixed maturity investments regularly available for purchase in the market (typically 30 years). For these long-dated products, Symetra is unable to fully match the obligation with assets until the remaining expected payout schedule comes within the duration of securities available in the market. If at that time, these fixed maturity investments have yields that are lower than the yields expected when the structured settlement product was originally priced, the spread for the product will shrink and Symetra will ultimately harvest lower returns for its shareholders. GAAP comprehensive net income increases when rates decline, which would suggest an increase in the value of Symetra - the opposite of what is happening to the intrinsic value of the business. Therefore, White Mountains' management and Board of Directors use adjusted comprehensive net income when assessing Symetra's quarterly financial performance. In addition, this measure is typically the predominant component of change in adjusted book value per share, which is used in calculation of White Mountains' performance for both short-term (annual bonus) and long-term incentive plans. A schedule is included in Exhibit 99.1 to this Form 8-K that reconciles White Mountains' comprehensive net income to adjusted comprehensive net income.

Adjusted book value per share is a non-GAAP measure which is derived by expanding the GAAP calculation of book value per White Mountains common share to exclude net unrealized gains/ (losses) from Symetra's fixed maturity portfolio. In addition, the number of common shares outstanding used in the calculation of adjusted book value per share are adjusted to exclude unearned shares of restricted stock, the compensation cost of which, at the date of calculation, has yet to be amortized. A schedule is included in Exhibit 99.1 to this Form 8-K that reconciles White Mountains' book value per share to adjusted book value per share.

## WHITE MOUNTAINS REPORTS ADJUSTED BOOK VALUE PER SHARE OF \$378

**HAMILTON, Bermuda** (July 31, 2009) – White Mountains Insurance Group, Ltd. reported an adjusted book value per share of \$378 at June 30, 2009, an increase of 8% for the quarter.

Ray Barrette, Chairman and CEO, commented, “I am pleased with our strong performance. Investments returned over 4% in the quarter while we maintained our capital preservation focus. At the same time, our major businesses all performed well, as we remain disciplined in mostly soft markets. OneBeacon had an excellent quarter with 12% growth in BVPS and a 93% GAAP combined ratio. White Mountains Re produced an 87% GAAP combined ratio helped by low catastrophe claims. Esurance was nicely profitable but premiums declined. On the capital management front, OneBeacon bought back some debt and White Mountains Re is reorganizing its Bermuda business into a branch structure while maintaining full operations there. This reorganization will significantly improve operational and capital efficiency and allow us to harvest \$400 million of capital from the reinsurance business, reflecting our good results and our significant reduction in premiums and exposures. The Life Re business stabilized during the quarter but we reported a loss due to the reduction in surrender assumptions reflecting low surrenders so far this year.”

Adjusted comprehensive net income was \$236 million for the second quarter and \$226 million for the first six months 2009, compared to adjusted comprehensive net losses of \$17 million for both 2008 periods. Net income for the second quarter was \$180 million, compared to a net loss of \$9 million, while net income was \$211 million in the first six months of 2009, compared to a net loss of \$66 million.

### OneBeacon

OneBeacon’s book value per share increased 12% in the second quarter and 15% in the first six months, including dividends. The GAAP combined ratio for the second quarter of 2009 was 93% compared to 94% for the second quarter of last year, while the GAAP combined ratio for the first six months of 2009 was 93% compared to 97% for the first six months of last year. The second quarter and first six months of 2009 included 4 points and 3 points of net favorable loss reserve development compared to 0 points and 1 point of net favorable loss reserve development in the second quarter and first six months of last year.

Mike Miller, CEO of OneBeacon, said, “We are very pleased with our excellent second quarter results. Our book value per share increased by 12% reflecting a solid 4% investment return and 93% combined ratio for the quarter. All of our businesses contributed to this result, with particularly strong results in Specialty. We also reduced debt by \$78 million during the quarter, contributing to a six point improvement in our debt to total capital ratio since year-end 2008. In these continued soft market conditions, our focus will remain on underwriting discipline and sound capital management.”

Net written premiums were \$498 million for the second quarter and \$967 million for the first six months of 2009, a decrease of 6% and an increase of 1% from the comparable periods of 2008, respectively. Specialty Lines premiums increased by 11% for the second quarter, mainly driven by Entertainment Brokers International, which was acquired in the third quarter of 2008, and 32% for the first six months, largely driven by the collector car and boat business that OneBeacon began writing in the second quarter of 2008. Personal Lines premiums decreased by 18% for the quarter and 14% for the first six months, principally resulting from premiums ceded under a new quota share treaty designed to reduce property catastrophe exposure from homeowners business. Commercial Lines premiums decreased by 9% for the quarter and 8% for the first six months.

### White Mountains Re

White Mountains Re’s GAAP combined ratio for the second quarter of 2009 was 87% compared to 114% for the second quarter of last year, while the GAAP combined ratio for the first six months of 2009 was 83% compared to 104% for the first six months of last year. Both 2009 periods benefited from minimal net adverse loss reserve development and lower catastrophe activity. The second quarter and first six months of 2009 did not include significant loss reserve development, while the second quarter and the first six months of 2008 included 21 points and 16 points of unfavorable loss reserve development. The second quarter of 2009 included 4 points of catastrophe losses, net of reinsurance and reinstatements, primarily from storms in Eastern Europe, compared to 10 points in the second quarter of 2008 from the earthquake in China, storms in China and Germany and Midwestern U.S. floods. In addition to these natural property catastrophe losses, White Mountains Re recorded approximately 3 points of loss, net of reinsurance and reinstatements, from the Air France plane crash during the second quarter of 2009. For the first six months 2009, White Mountains Re recorded 4 points of catastrophe losses, which included 3 points from European winter storm Klaus. For the first six months of last year, White Mountains Re recorded 6 points of catastrophe losses. Net written premiums were down 11% for the quarter and 13% for the six months.

Allan Waters, CEO of White Mountains Re, said, “Few catastrophes and a strong balance sheet both came into play again and we produced another solid quarter. Today, we announced a reorganization of our Bermuda business to a branch structure that will make us more efficient – both from a capital standpoint and operationally. Our underwriting centers are well positioned to react to opportunities as they emerge around the globe.”

### Esurance

Esurance’s GAAP combined ratio for the second quarter of 2009 was 100% compared to 105% for the second quarter of last year, while the GAAP combined ratio for the first six months of 2009 was 102% compared to 109% for the first six months of last year. The loss ratio was 71% and 73% for the second quarter and first six months of 2009, compared to 75% and 78% in the second quarter and first six months of last year. The decreases in the loss ratio were largely due to the impact of selective rate adjustments made in late 2007 and early 2008 and lower claims frequency as a result of reduced driving. The expense ratio was 29% for both the second quarter and first six months of 2009, compared to 30% and 31% in the second quarter and first six months of last year. The decreases in the expense ratio were primarily due to lower acquisition expenses from reduced advertising spending.

Gary Tolman, CEO of Esurance, said, "The Esurance segment recorded a strong increase in profitability in the second quarter and on a year-to-date basis primarily due to improved underwriting results. However, our disciplined pricing and lower marketing spend have impacted premium growth at a time when there are fewer shoppers in the market overall. In the second quarter, Answer Financial increased revenue and profits compared to the second quarter of 2008."

Controlled premiums, which include policies sold by Answer Financial, were \$266 million and \$564 million in the in the second quarter and first six months of 2009 compared to \$281 million and \$594 million in the second quarter and first six months of last year. Direct premiums underwritten by Esurance were \$181 million in the second quarter and \$395 million in the first six months of 2009, a 9% and 8% decrease from the comparable periods of 2008. As of June 30, 2009, the Esurance segment had 759,000 policies-in-force, including 292,000 policyholders at Answer Financial. The Esurance segment added approximately 14,000 policies-in-force during the first half of 2009.

2

---

### **Other Operations**

White Mountains' Other Operations segment's pre-tax loss in the second quarter was \$38 million, compared to \$6 million of pre-tax net income in the second quarter of last year, while pre-tax loss was \$76 million in first six months of 2009, compared to \$24 million in first six months of last year. The pre-tax losses in both 2009 periods were predominantly attributable to the Life Re business, which reported \$27 million and \$58 million in pre-tax losses for the second quarter and first six months of 2009, compared to \$12 million of pre-tax gains in the second quarter of last year and \$9 million of pre-tax losses in the first six months of last year. The Life Re results in both 2009 periods include \$22 million of losses from surrender assumption revisions made in the second quarter of 2009. In addition to the surrender assumption revisions, the losses in Life Re for the first six months resulted from the effect of volatile market conditions on the valuation of Life Re's derivative assets and liabilities. White Mountains continues to explore options to limit the cost of running off these contracts.

### **Investment Activities**

The GAAP total return on invested assets for the second quarter and first six months of 2009 was 4.4% and 4.3%, including 1.0% and 0.4% from currency gains, compared to 0.6% and 1.2% for the second quarter and first six months of last year. Net investment income was \$77 million and \$138 million in the second quarter and first six months of 2009, down from \$112 million and \$229 million in the second quarter and first six months of last year. The decline in both periods was primarily due to lower overall portfolio yields, shifts in portfolio mix to lower risk, lower yield investments and a decrease in the overall invested asset base.

Manning Rountree, President of White Mountains Advisors, said, "Our total investment portfolio was up 4.4% in the second quarter and 4.3% year to date, including modestly positive returns on currency movements in the second quarter. These are nice results, particularly in light of our capital preservation strategy and our conservative asset allocation. Measured in local currencies, our fixed income portfolio was up 3.3% in the second quarter and 4.8% year to date, outperforming the Barclays U.S. Intermediate Aggregate over the same periods. In particular, our corporate bond portfolio has performed well. Our fixed income portfolio remains short duration and liquid, and we have continued to avoid the credit losses affecting so many financial institutions. Our equity, convertible and alternative asset portfolio was up 7.9% in the second quarter and 1.6% year to date, lagging the S&P 500 return over the same periods, largely because of the portfolio mix, which is tilted away from common stocks and toward convertibles and alternative assets."

### **Additional Information**

During the first quarter of 2009, White Mountains adopted FAS No. 160, *Noncontrolling Interests-an amendment to ARB 51* ("FAS 160"). As a result, White Mountains has changed the presentation of its financial statements for prior periods to conform to the required presentation, as follows: noncontrolling interests (previously referred to as "minority interests") are now presented on the balance sheets within equity, separate from White Mountains' shareholders' equity, and the portion of net income, extraordinary item and comprehensive income attributable to White Mountains' common shareholders and the noncontrolling interests are presented separately on the consolidated statements of operations and comprehensive income. The adoption of FAS 160 did not impact White Mountains common shareholders' adjusted book value per share.

White Mountains is a Bermuda-domiciled financial services holding company traded on the New York Stock Exchange and the Bermuda Stock Exchange under the symbol WTM. Additional financial information and other items of interest are available at the Company's website located at [www.whitemountains.com](http://www.whitemountains.com). The Company expects to file its Form 10-Q with the Securities and Exchange Commission on or before August 10, 2009 and urges shareholders to refer to that document for more complete information concerning White Mountains' financial results.

### **Regulation G**

This earnings release includes two non-GAAP financial measures that have been reconciled to their most comparable GAAP financial measures. White Mountains believes these measures to be more relevant than comparable GAAP measures in evaluating White Mountains' financial performance.

Adjusted comprehensive net income is a non-GAAP financial measure that excludes the change in net unrealized gains/(losses) from Symetra's fixed maturity portfolio from comprehensive net income. The reconciliation of adjusted comprehensive net income to comprehensive net income is included on page 8.

Adjusted book value per share is a non-GAAP measure which is derived by expanding the calculation of GAAP book value per White Mountains common share to exclude net unrealized gains/(losses) from Symetra's fixed maturity portfolio. In addition, the number of common shares outstanding used in the calculation of adjusted book value per share are adjusted to exclude unearned shares of restricted stock, the compensation cost of which, at the date of calculation, has yet to be amortized. The reconciliation of adjusted book value per share to book value per share is included on page 7.

## Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995

This earnings release may contain “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements, other than statements of historical facts, included or referenced in this release which address activities, events or developments which we expect or anticipate will or may occur in the future are forward-looking statements. The words “will,” “believe,” “intend,” “expect,” “anticipate,” “project,” “estimate,” “predict” and similar expressions are also intended to identify forward-looking statements. These forward-looking statements include, among others, statements with respect to White Mountains’:

- changes in adjusted book value per share or return on equity;
- business strategy;
- financial and operating targets or plans;
- incurred losses and the adequacy of its loss and loss adjustment expense reserves and related reinsurance;
- projections of revenues, income (or loss), earnings (or loss) per share, dividends, market share or other financial forecasts;
- expansion and growth of our business and operations; and
- future capital expenditures.

These statements are based on certain assumptions and analyses made by White Mountains in light of its experience and perception of historical trends, current conditions and expected future developments, as well as other factors believed to be appropriate in the circumstances. However, whether actual results and developments will conform to our expectations and predictions is subject to a number of risks and uncertainties that could cause actual results to differ materially from expectations, including:

- the risks associated with Item 1A of White Mountains’ 2008 Annual Report on Form 10-K;
- claims arising from catastrophic events, such as hurricanes, earthquakes, floods or terrorist attacks;
- the continued availability of capital and financing;
- general economic, market or business conditions;
- business opportunities (or lack thereof) that may be presented to it and pursued;
- competitive forces, including the conduct of other property and casualty insurers and reinsurers;
- changes in domestic or foreign laws or regulations, or their interpretation, applicable to White Mountains, its competitors or its clients;
- an economic downturn or other economic conditions adversely affecting its financial position;
- recorded loss reserves subsequently proving to have been inadequate;
- other factors, most of which are beyond White Mountains’ control.

Consequently, all of the forward-looking statements made in this earnings release are qualified by these cautionary statements, and there can be no assurance that the actual results or developments anticipated by White Mountains will be realized or, even if substantially realized, that they will have the expected consequences to, or effects on, White Mountains or its business or operations. White Mountains assumes no obligation to publicly update any such forward-looking statements, whether as a result of new information, future events or otherwise.
